Art Generator is a simple application that allows users to create their fine art paintings with the help of AI.

1. APP STRUCTURE

2. MAJOR FUNCTIONS

The application allows users to:

- Create their own drawing supported by QuadFlask Colorpicker and export images in *.PNG format
- Load pictures from photo gallery or take pictures
- Choose from more than 50 filters (data retrieved from DeepArtEffects) that are extracted art styles of famous artists from the available gallery and find the desired effect

3. SCREENSHOTS
